### 3M PB909-CA Contact Adhesive

**PB909-CA**  
15.7 oz. can

- CA Compliant\* industrial grade spray adhesive
- Heavy duty lace spray pattern with variable nozzle (2"-4" wide)
- Clear, high-strength
- Up to four minute rework time, full bond within 30 minutes

3M™ PB909 CA High Strength Adhesive is an industrial grade high strength aerosol spray adhesive used to bond many materials including wood, foam, non-vinyl fabrics, carpet, concrete, house wrap and metals. Bonds Clear, Strong and Fast.

It provides good initial tack on contact. Features up to four minute open time and fully bonds within 30 minutes. The clear, industrial grade adhesive is CARB-compliant\*. The variable nozzle produces a lace spray pattern between 2" and 4" wide. This adhesive bonds many materials in the crafts and displays (decorative laminate, plastics, metals, carpet), construction (plywood, concrete, plastic sheeting) and upholstery (foams, non-vinyl fabrics, wood) industries.

\* This adhesive meets the California Air Resources Board (CARB) 2017 Volatile Organic Compounds (VOC) limit for web spray adhesives.
